This form constitutes a formal request from producing entities to TMH Corp. to provide measurement services in connection with the TASA program of the MPAA. TMH Corp. is an independent Audio Engineering Company (IAE) and is authorized by the MPAA to test theatrical trailers for loudness according to the TASA standard. The fee for this service is \$425 USD per trailer version tested. The fee covers initial testing of one version of the trailer, issuance of a TASA Leq(m) rating certificate, and testing of a corresponding randomly selected release print. The Leq(m) measurements are provided for eval purposes only and in no way represent the level of trailer during exhibition. The producing entity is responsible for ensuring trailers are used properly. This agreement releases TMH and all employees from all claims, losses, expenses, including attorneys fees arising from or in connection with this agreement. The producing entity's sole remedy for material breach of this agreement by TMH is refund of the testing fee paid by producing entity.
